U.S. AIR FORCE

Readiness

How do you know you are prepared?

U.S. AIR FORCE

Readiness

- SORTS
 - Status of Resources and Training
- ART
 - AEF UTC Reporting Tool

Are you ready?

U.S. AIR FORCE

What is SORTS

- In AF, applies to all MAJCOMS, Air National Guard (ANG), Field Operating Offices (FOA), and Direct Reporting Units (DRU)
- A management tool used by the CJCS, Services, Unified Command, and Combat Support Agencies
- Indicates readiness of selected resources & training status to meet OPLAN/CONPLAN taskings
- Not designed for performance appraisal of unit
- Fundamental premise of SORTS reporting is “integrity”. CCs must “tell like it like it is” and not allow masking of deficiencies affecting their readiness.

U.S. AIR FORCE

Who Reports SORTS

- All combat & support units sourced to an OPLAN, CONPLAN, the SIOP, or a Service war planning document
- Your resources may be reported by another unit

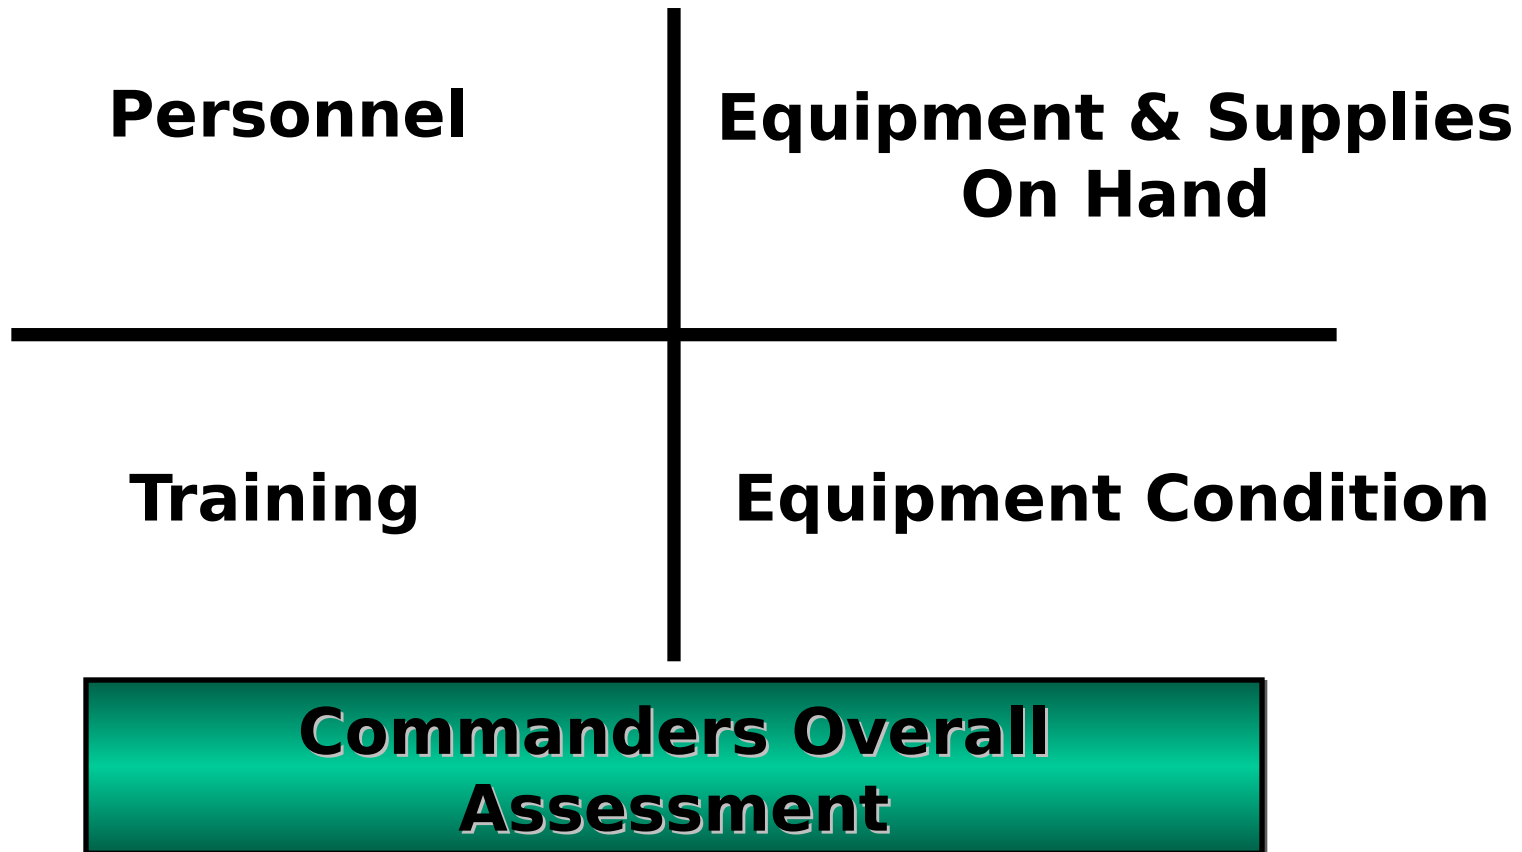

U.S. AIR FORCE

SORTS

What do you Report?

- Four Measured Areas

U.S. AIR FORCE

AEF Reporting

- AEF UTC readiness reporting tool (ART)
 - In AF, applies to **ALL** Air Force & Air Reserve Component (ARC) activities that organize, train, equip, deploy, or employ units and individuals in AEF operations.
 - Web-based
 - UTC level of detail
 - Status of UTC

U.S. AIR FORCE

ART Reporting vs SORTS

- Different baseline/assumptions
 - MTW versus steady state
 - DOC response time vs. AEF/AEW response time
 - Personnel from unit versus “in bucket”
- Not all units report via SORTS
 - PACAF & USAFE CONS don't SORTS report

U.S. AIR FORCE

AEF Reporting

- Measure readiness against UTC-defined capabilities
- Personnel
 - Measure against AFSC and skill levels in MANFOR
- Training
 - Measure against individual requirements (I.e NBCDT/EOR, M9/M16, etc)
 - UTC - measure against MISCAP
- Equipment (laptops, masks)
 - Use LOGFOR to measure equipment and supplies
- Equipment condition
 - Serviceable equipment

U.S. AIR FORCE

AEF Reporting: What to Report

- Refine reporting through AEF cycle
- Prior to DRMD
 - Unit commanders report on full UTC for worldwide tasking
- After DRMD
 - Indicate that UTC is “Tasked to Deploy”
 - Indicate if the UTC can meet “Theater Specific Requirements / Line Remarks”
 - Add remarks as required
 - Continue reporting residual UTC capability

U.S. AIR FORCE

AEF Reporting: Readiness Levels

- NO-GO – UTC has a missing or deficient capability that would prevent the UTC from being tasked and accomplishing its mission
- CAUTION – UTC has a missing or deficient capability but would not prevent the UTC from being tasked and accomplishing its mission
- GO – Personnel and equipment for the AEF allocated UTCs are available for deployment within 72 hours of notification

U.S. AIR FORCE

AEF Reporting: AEF Reporting Tool

AEF Reporting Tool (ART)

- Unit CC uses to report UTC status
- Multi-level leadership access
- SIPRNET based
